Subject: Partnership for Interreg Programme

Dear Baltic Sea Region friend,

The Institute of Sustainable Development of Poland, one of the key partners in the project “Towards Baltic 2030 – From Talk to Work”, is now looking for organizations who are willing to cooperate in a project, which will apply for funds to the Interreg Baltic Sea Programme call. The project will deal with integration of urban revitalization plans to climate policy involving local communities and schools with the aim to prepare education programs about energy efficiency and renewable energies for kids and adults from local communities, trigger capital generation in local communities, and building skills and empowering local communities for investments.

Please read the proposals attached in this e-mail and share it with organizations and partners that might be interested. You are also welcome to respond to the call yourself no later than the **30th October**.

The project will contribute to increase activity in the region regarding SDGs implementation and particularly to climate change objectives at local level, therefore I encourage you to spread the word and join the partnership. Please do not hesitate to contact Mr. Wojciech Szymalski, Foundation institute for Sustainable Development, tel. +48 851 04 02, w.szymalski@ine-isd.org.pl

Kind regards,

Olga Zuin
